

# Nitrous

## **Nitrous - Summit kit using nitrous?**

Question)Hello Joe, I'm curious about the high elevation clutch kit for my 07 Summit. My question is I plan on installing nitrous for this season so will this kit work for me?

Answer)The kit for your sled c/w primary spring/pin kit /roller helix. Just follow the calibration as per the setup sheet and go. Regarding Nitrous, guys who run a 20 to 40hp shot usually see a 200~250 increase in rpms when running the kit. There are guys who have a 50hp shot in 07R and run up to 400 rpms over stock rpms and seems ok to me because of good feedback the marriage of the kit / nitrous works well.

## **Nitrous - Trail sled using nitrous?**

Question)Hello Joe, I'm curious about your clutch kit using Nitrous? Does the kit compensate for it?

Answer) Regarding Nitrous, guys who run a 20 to 30hp shot usually see a 200~250 increase in rpms when running the kit. There are guys who have a 40hp~50hp shot and can see up to 400 rpms over stock rpms - feedback the marriage of the trail kit / nitrous works well.
